How To Update Tattu TA3200 Charger Firmware

Please update your charger's firmware:

- This firmware update can only be performed on a Windows system computer.
- There is a USB cable included with the charger accessories, which is used for the upgrade.
- Open the firmware file and follow the instructions below.

To install the firmware update, follow these instructions:

1. Download the file, then extract the zipped file
2. double click on the file to open it until you get to this screen

3. Unplug the power cable on the charger
4. Plug the USB cable into the back of the charger and your Windows PC
5. On the charger, press and hold the "channel" button, and continue to hold through the next steps.
6. Plug the charger power cable back in, you will hear it beep a few times while you are holding down the "channel" button.

7. Press on the green "Upgrade" button. Once the upgrade begins, you can let go of the "channel" button. Update will complete momentarily.
8. Once complete, remove the USB from the charger and your PC.
